Electric Boats & Marine Application

There has been a Pb Batteries in the British industrial battery sector for over 30 years. Our Gryphon logo depicts a mythical creature that has been around even longer. The Gryphon has been a symbol of vigilance and strength for centuries, and at Pb Batteries we endeavour to maintain that premise by

watching what we do, and doing what we do well.

We specialise in sales and service of batteries, chargers and ancillary equipment such as automatic topping up systems. Our mobile engineers are employed directly by the company, most having been drawn from within the industry. Our old adage of "large enough to cope, but small enough to care" applies even more so in the 21st century.

Commitments to health and safety and the environment require our vigilance, and our strength is required to provide our customers with service levels second to none.

Why not give us a call, you won't be put on an impersonal automated help line, or speak with someone thousands of miles away, just a friendly voice waiting to put our expertise at your disposal.

Electric Boats

Pb Batteries have many years experience in supplying the right package for your environmentally friendly powered electric boats.

Chargers

We supply a range a chargers, as well as maintain and repair. All our engineers carry spares for all makes of charges, we're only a phone call away.

Topping-up Systems

Our de-mineralisation systems will reduce your costs and assist to keep your batteries topped to correct levels.

Conversion

We can help you convert your diesel powered boat to electric power. Call us to discuss your requirements.

Solar Powered

In a time when we are all environmentally conscious a solar powered boat could be just the thing for you. We have a range of batteries - flooded or gel, ready for your conversion.

Environmentally Friendly

All our batteries are environmentally friendly. Up to 90% of the waste battery is recycled.

Canal Boats

Whether for battery powered narrow boats or for use of auxiliary power.
